CL 70

CROSS STITCH SWEATERS SWEATS AND TEES

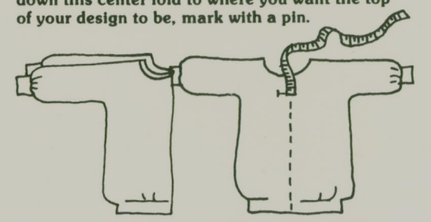
Country designs easily stitched on 8.5 or 10 to the inch waste canvas.

Designed by Barbara Finwall

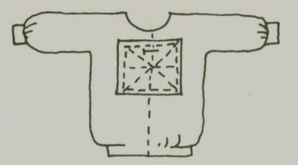
HOW TO USE WASTE CANVAS

1. Cut waste canvas to size (see charts).

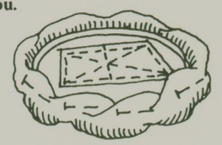
2. Fold garment in half lengthwise. Measure down this center fold to where you want the top of your design to be, mark with a pin.



3. Find center of canvas, line this up with the center fold in the garment. Use the blue threads in canvas to place canvas straight on garment. Pin in place so that you have about ½" of canvas above the pin, marking the top of your design. Baste all around the edge. On large designs baste from corner to corner and from side to side to prevent fabric from slipping.



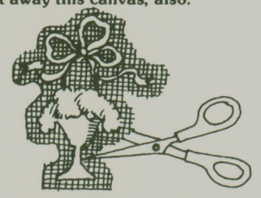
4. If desired, place fabric in hoop. Roll excess fabric over top edge of hoop and pin in place. We didn't use hoops on ours, but if you usually use a hoop, this method would be more comfortable for you.



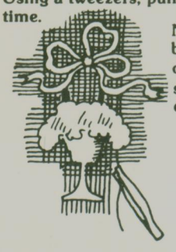
5. Stitch design, using the large holes (not the small ones where the threads intersect).

Use 6 strands of floss for sweaters and 4 strands for sweatshirts. 2 strands for backstitch.

6. Trim canvas close to edge of design, being careful not to cut fabric. On large designs with lots of empty space between stitching you may want to cut away this canvas, also.



7. Dampen canvas with sponge or spray bottle. Using a tweezers, pull out threads one at a time.



NOTE: You may want to baste interfacing to the back of your fabric before or after stitching. However we didn't do that on these pieces.

Size to cut waste canvas is shown under each chart.

BORN TO SHOP

	DMC	BATES
Light Blue	932	132
Dark Blue	311	148
Dark Red	221	897
Gold	729	890
Beige	3032	833
